To,
HR Department
Bell Canada
Toronto, Ontario, Canada

Dear Recruiter,

I am writing this letter to apply for Customer Operations Business Intelligence Intern Program at Bell Canada. I came to know about this opportunity from a career fair event which I attended at Concordia university. Bell's BI team optimizes cutting-edge tools and technologies and I would feel highly privileged to be a part your team. I am confident that my work experience as a software developer would fulfill qualification criteria for this job.

I am currently pursuing masters in applied computer science at Concordia university. I have 5 years of industrial experience as an embedded software developer. Now, I want to make a **career shift** into the world of Business intelligence. To build a solid foundation in machine learning, I have enrolled in subjects related to artificial intelligence. Apart from that, I am building open source machine learning projects on GitHub. Also, I have done online courses of Deep learning and Machine learning on Udacity.

Please find enclosed my resume and feel free to call me at 514-431-2331, to arrange a time for an interview. I look forward to hearing from you.

Thank you for considering my application.

Regards,
Mehul Prajapati
